[Document Type] CLAIMS
[Claim 1]

A culture treatment apparatus comprising:

a treatment chamber in which is stored a treatment device which opens a lid of a culture container storing a specimen to perform a predetermined treatment on the specimen inside of the culture container; and

a sheet member arranged below the culture container, which covers a top surface of said treatment device.

10 [Claim 2]

A culture treatment apparatus according to claim 1 comprising:

a supply roll made from said sheet member in belt shape rolled into a roll shape;

a sheet supply device which sends out the sheet member from said supply roll; and

a sheet collection device which collects the used sheet member.

[Claim 3]

A culture treatment apparatus according to claim 2, wherein said sheet collection device comprises a roll-up device which rolls up the sheet member into a roll shape.

[Claim 4]

A culture treatment apparatus according to claim 2,

25 wherein said sheet member is made from a liquid absorbable

material.

[Claim 5]

A culture treatment apparatus according to claim 1 comprising an antiseptic solution supply device which impregnates an antiseptic solution into said sheet member.

[Claim 6]

A culture treatment apparatus according to claim 1, wherein said sheet member is made of a material having an antibacterial action.

10 [Claim 7]

15

A culture treatment apparatus according to claim 1 comprising a tray supply device which supplies a tray member onto a stage where a culture container is mounted, when a predetermined treatment is applied to a specimen in the culture container by opening a lid of the culture container storing the specimen.

[Claim 8]

A culture treatment apparatus according to claim 7 comprising a tray collection device which collects a used tray member after a treatment on a specimen in a culture container is completed, and the culture container is removed from the tray member.

[Claim 9]

A culture treatment apparatus according to claim 7,

25 wherein said tray member is provided with a fixing portion

which fixes a culture container on said tray member.
[Claim 10]

A culture treatment apparatus according to claim 7, wherein said tray member is provided with a peripheral wall which surrounds a culture container when it is mounted thereon.

[Claim 11]

5

15

An automatic culture apparatus comprising:

a culture chamber which stores a culture container

10 storing a specimen, in a manner where it can be put in/taken

out;

a treatment chamber which is arranged outside of said culture chamber, and which stores a treatment device which opens a lid of the culture container to perform a predetermined treatment on the specimen inside of the culture container; and

a carrier mechanism which carries the culture container between the treatment chamber and the culture chamber; wherein

at least either one of said treatment chamber and said

culture chamber comprises a sheet member arranged below the

culture container, which covers a top surface of said

treatment device.
